

# ***River Warrior***

## **Water Conservation**

We implore you to not put chemicals, waste, rubbish, and litter in general into our waterways to prevent habitat loss and pollution.

## **How Can Recycling Be Useful**

Recycling can make it possible for more wildlife to thrive because they have a clean environment to live in. It can prevent pollution and the endangerment or even extinction of animals in the Wambool. It can also save our land so we don't have piles of rubbish everywhere we go.

## **Custodianship**

Having custodianship you should learn about the traditional owners of the land. You should also care for the country, also maintaining cultural heritage. You can appreciate and support the efforts of aboriginal and first nations people.
